Dear First Graders,

It has come to my attention that the school library is in despite need of learning materials that represent addition and subtraction. I feel you have what it takes to create these materials to clearly show how important it is to know number sense and grouping when learning how to add and subtract numbers. In addition, it is important that you incorporate synonyms for addition and subtraction so future viewers of the materials will increase their vocabulary. I look forward to showcasing your creations in the school library.

Thank You,

The Principal
